Public Notice

California, under the fictitious firm name of SEMICONDUCTORS MACHINETOOL CO., and that said firm is composed of the following persons, whose name and address is as follows, to-wit:

LARGEST EVER . . . The largest ductile-iron casting die ever produced is shown here after completion at the National Supply plant. It was cast and machined here for the Ryan Aeronautical Co., and it will be used to fabricate core domes for the new, super-size radar reflector antennas. The 20-ton die is 78 inches in diameter

and has a 22-inch contour depth. (For the technically minded, it was reported that the casting was attached to a 14-foot vertical boring mill, and that an MIMIK tracer held exacting tolerances "on X and Y coordinates following the curve to an amazing (plus or minus .002 inch)."

Old Tradition Being Revived In Palos Verdes

The old traditional Barber-shop Quartet movement that sprang from the grass roots of America has come back to the Palos Verdes Peninsula with improvements. Thanks to the Society for the Preservation and Encouragement of Barber-shop Quartet Singing in America, Inc., the Palos Verdes Chapter is attracting men from all walks of life in our community to join in singing those good old songs, and blending their voices in furbelowed harmony.

That's why SPEBSQSA Inc. has moved across America with the velocity of a twister. Men everywhere take to it and that's a discovery that our neighbors in the area made after singing in the 4 Part Harmony Chorus group session on Monday evenings. Harmonizing such good old numbers as "When You Were Sweet Sixteen," "You Tell Me Your Dream," "In The Evening By The Moonlight," "She's Only A Bird In A Gilded Cage," and a few others in classic barbershop style.

Membership in the new Palos

Verdes Chapter SPEBSQSA Inc. is open to all congenial men and an invitation is extended to them to attend next Monday's meeting at 7:30 p.m. at the South High School Music Room, R2 located on 101, Pa-
